

WASHPOWER™

# Automate strenuous power washing in swine housing and increase efficiency and happiness at work

- Improves happiness at work, reduces strain, and increases employee retention
- Get a return on investment as low as 1 year by reducing 80% of labor needed to wash
- Reduce stress by programming the robot to run during nights and weekends

For over 10 years the ProCleaner XS100 has transformed the washing routine at swine houses for farmers across the world. The robot is an efficient extra worker helping in your daily work on the farm. It is a reliable washing robot that cuts tedious power washing to a minimum, while improving your operational economy and happiness at work.

ProCleaner XS100 reduces up to 80% of the time spent on manual power washing. Automizing the washing, means more time spent on animal care resulting in better production results. The robot is easy to operate and designed to fit most farm layouts. This is ensured by continuous development in close collaboration with farmers and with experience from more than 1,000 units sold in over 33 countries.

Feedback from our customers tells us that the robot quickly becomes an indispensable piece of equipment that is part of daily routine. The robot is described as a reliable worker that always delivers the same good wash result, and shows up for work even at night or during the weekends or holidays.

# Dimensions and data for the XS100

## TECHNICAL DATA

Dimensions HxWxD 63 x 20.87 x 43.3 inch

Weight 588 lbs

Power supply 120V

Amperage 6 amp

Water consumption Min. 5 / Max 10.6 gallon/m

Max. water pressure 2900 psi

High pressure pump External

Max. water temperature 140° F

### Powerful nozzles

ProCleaner XS100 is equipped with two specially developed nozzles that are engineered to shape the water into powerful and long reaching water jets.

### PLC control system with touchscreen

ProCleaner XS100 is easily operated from the touch sensitive color screen. The software is intuitively designed for easy programming and daily-use.

### Mobile and easy to store

When the washing robot is not being used, it is easily moved to storage with the included trolley. When stored the side arms can be removed and placed neatly on the side of the robot.

### Specially developed reel and twin-hose

A specially developed hose reel with a twin-hose combining water and electricity is automatically rolled out when the robot is operating. When the robot is returning, the hose is reeled in automatically, which keeps handling to a minimum.
